

STONE BLOCK

AVAILABLE IN 20KG BLOCKS

A supplement containing ammonium chloride, formulated to help manage the risk of urinary calculi, commonly known as 'water belly,' in livestock.

Olsson's Stone Block is a supplement formulated for livestock on diets that may contribute to bladder stone formation. Certain dietary factors — such as high phosphorus levels in grain, excess sodium bicarbonate, reduced water intake, or vitamin A deficiency — can be associated with urinary challenges in ruminants.

This block provides a source of minerals and nutrients in block form, intended for use in feeding systems where dietary balance is an important consideration.

Storage Instructions:

Store out of direct sunlight and under cover. Avoid contact with skin and eyes. Edible carton and packaging.

DIRECTIONS FOR USE	TYPICAL ANALYSIS										
Sheep: 5-10g per head per day Cattle: 50-100g per head per day Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies. For use in cereal pasture with grain rations.	<table><tr><td>Ammonium Chloride</td><td>1% (10g/kg)</td></tr><tr><td>Salt (NaCl)</td><td>80%</td></tr><tr><td>Calcium Carbonate</td><td>9%</td></tr><tr><td>Molasses</td><td>10%</td></tr><tr><td>Selenium (Se)</td><td>26mg/kg</td></tr></table>	Ammonium Chloride	1% (10g/kg)	Salt (NaCl)	80%	Calcium Carbonate	9%	Molasses	10%	Selenium (Se)	26mg/kg
