Olsson's Trace Element Northern Breeder is a macro mineral supplement designed for a broad range of mineral deficiencies that are common in northern pastures. Trace Element Northern Breeder also has additional zinc & selenium for cow & bull reproductive performance.

Balancing essential elements & minerals result in the efficient breakdown of feed consumed by the animal. Deficiencies in copper, iron, zinc, manganese, cobalt, iodine, & selenium can reduce the animal's growth and reproduction rates, and result in less efficient feed conversion and depressed immunity. Balancing these elements will improve general production of the herd.

DIRECTIONS FOR USE

Feeding Instructions:

Use in accordance with the Olsson Free Choice System.

Sheep/Goats: 5-10g per head per day

Cattle: 50-100g per head per day

Place near water troughs, dams and stock camps. Place out sufficient blocks to avoid overcrowding of stock. Replace blocks immediately when consumed.

Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies.

Avoid contact with skin and eyes.

Storage Instructions:

Store out of direct sunlight and under cover. Edible carton and packaging.
