

NEW ENGLAND BLOCK

AVAILABLE IN 20KG BLOCKS

A bentonite based multi-nutrient supplement providing essential minerals to the rumen. For the specific needs of breeding stock and their young.

Olsson's New England Block is designed to supply additional nutrients for breeding stock and their young. The blocks contain a balance of trace elements to complement feed and pasture availability throughout the breeding cycle.

New England Block has a base of salt, bentonite, calcium, phosphorus and sulphur, along with zinc, cobalt and iodine, providing a broad range of essential minerals in a convenient block form.

Storage Instructions:

Store out of direct sunlight and under cover. Edible carton and packaging. Avoid contact with skin and eyes.

DIRECTIONS FOR USE

Sheep/Goats: 5-10g per head per day

Cattle: 50-100g per head per day

Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies. Remove outer carton and plastic cover and place near water troughs, dams and stock camps. Place out sufficient blocks to avoid overcrowding of stock. Replace immediately when consumed.

TYPICAL ANALYSIS

| | | | |
|----------------|-------|---------------------|-----------|
| Molasses | 4.5% | Cobalt (Co) | 100mg/kg |
| Salt (NaCl) | 38% | Ferrous Iron (Fe++) | 1350mg/kg |
| Bentonite | 20% | Iron (Fe) | 650mg/kg |
| Calcium (Ca) | 10% | Iodine (I) | 1500mg/kg |
| Phosphorus (P) | 4.1% | Zinc (Zn) | 600mg/kg |
| Sulphur (S) | 3% | Potassium (K) | 800mg/kg |
| Magnesium (Mg) | 0.08% | Selenium (Se) | 26mg/kg |
