

STOCK

TRANZ

A water soluble supplement suitable for all livestock including cattle, sheep, goats, horses & alpacas. It aids in weight loss reduction during transit, reduces stress levels & aids in fuss free weaning.

SUITABLE FOR:

STOCK TRANZ

8x150G &
1KG BLOCKS

When an animal is in distress, stress hormones and adrenalin effect the electrolyte mineral balance in the animal's body.

Stock Tranz is a water soluble supplement in tablet form containing a balanced array of essential minerals, glucose & fructose. These essential minerals and sugars naturally lower the animal's stress levels, while also hydrating and replacing depleted electrolytes.

This results in a calmer, easier to handle animal.

TYPICAL ANALYSIS

Salt (NaCl)	20.92%	Fructose	1.8g/100g
Potassium (K)	2.51%	Glucose	2.2g/100g
Magnesium (Mg)	0.3%	Maltose	0.2g/100g
Sodium	8.2%	Lactose	0.2g/100g
Chloride	13.52%		

WHAT CAUSES ANIMALS TO STRESS?

**BEING
TRANSPORTED**

**BUSHFIRES/
NATURAL DISASTERS**

**WALKING LONG
DISTANCES**

**WEANING
& YARDING**

WHAT IS THE IMPACT OF STRESS?

STRESS CAUSES SHRINKAGE & DARK CUTTING.

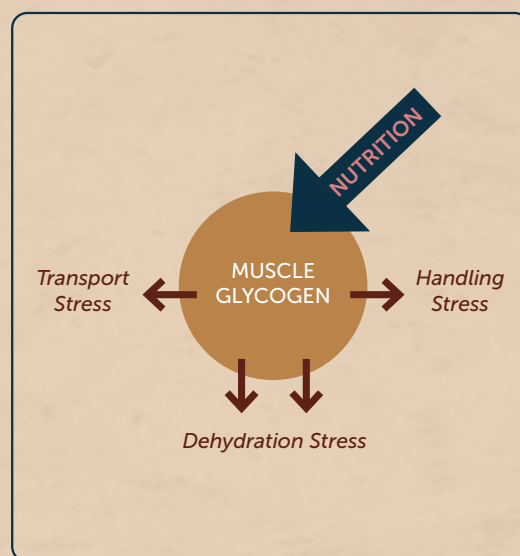

Unstressed cattle will drink between 40-45 litres of water per head per day, while stressed cattle will only drink between 25-35 litres of water per head per day.

This leads to both dehydration and shrinkage.

Stock Tranz can help reduce shrinkage by:

- *Maintaining a high electrolyte balance in the body (thereby reducing transport shrinkage weight loss).*
- *Controlling the release of stress hormones.*
- *Preventing stimulation of the immune system.*

Stock Tranz can help reduce dark cutting by increasing glycogen levels and controlling the release of stress hormones.

**STRESS EFFECTS ON
GLYCOGEN LEVELS**

HOW DO HANDLING CONDITIONS EFFECT CATTLE SHRINKAGE?

HANDLING CONDITIONS	PERCENT SHRINK
8 hour dry lot stand	3.3%
16 hour dry lot stand	6.2%
24 hour dry lot stand	6.6%
8 hours in moving truck	5.5%
16 hours in moving truck	7.9%
24 hours in moving truck	8.9%

IS STOCK TRANZ WORTH THE INVESTMENT?

1. Improved yield & quality = \$
2. Reduced shrinkage = \$
3. Shortened weaning time = \$
4. Calmer animals= increased feed consumption = \$

Cost per dose = \$1.40

**The return on shrinkage alone
can be more than 10 fold**

CUSTOMER **TESTIMONIALS**

DARRYL PEARCE

STOCK BUYER, GREENHAM, TAS

Stock Tranz has a dual effect:

- 1. Grading improvements- Higher quality meat.*
- 2. Yield improvements.*

"Stock Tranz animals are calmer and easier to handle, less stressed."

MICHAEL TAYLOR

CATTLE PRODUCER & AGENT, WALLUMBILA, QLD

Michael Taylor weighs cattle on and off trucks. The average fluid loss on a 4+ hour journey is 15kg. When using Stock Tranz the average fluid loss is 5kg.

"Stock Tranz is a wonderful product that hydrates cattle and increases calmness of herd. To maximise returns I recommend the use of Stock Tranz."

FEEDING INSTRUCTIONS

Drop necessary number of tablets into livestock's water supply (water trough or tank). The tablet will slowly dissolve, supplying all livestock with a balance of essential minerals, glucose & fructose.

For best results, stretch dosage out over a 24-48 hour period (eg. for 50 head of cattle, drop six tablets in water supply in the morning, and six in the middle of the day while in holding yards).

Consumption rate will vary as does each animal's thirst, but the sugars are the attractant formulated to entice the animals to drink irrespective of water hardness or quality. Once consumed the minerals will rehydrate muscle tissue.

The product cannot be overdosed, so there is no withholding period.

150G TABLET

1 x 150g tablet per 4 head of cattle, per dose.

1KG TABLET

1 x 1kg tablet per 20 head of cattle, per dose.
