Magnesium (Mg)	0.28%

MICRO INGREDIENTS

Iron (Fe)	1000mg/kg
-----------	-----------

**FOR ANIMAL TREATMENT ONLY.
THIS PRODUCT DOES NOT CONTAIN
RESTRICTED ANIMAL MATERIAL.**

Olsson's NT URAPHOS is designed to provide stock with maximum protein conversion by assisting stock to consume and utilise available dry feed.

NT URAPHOS is high in phosphorus making it the ideal product for phosphorus deficient pastures like those found in Northern Australia. With 30% urea this product offers superior feed conversion and the compressed dry block delivery system controls intake improving utilisation of urea in the ruminant. Suitable for all cattle breeds.

DIRECTIONS FOR USE

Feeding Instructions:

Use in accordance with the Olsson Free Choice System.

Cattle: 90-150g per head per day

Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies.

Place out sufficient blocks to avoid overcrowding of stock. Replace immediately when consumed.

Locate blocks away from watering points to avoid over consumption and to encourage stock to graze out, utilising the available paddock feed.

Avoid contact with skin and eyes.

Warning: Products containing urea can be toxic to livestock. Please ensure proper farm management practices are employed.

Storage Instructions:

Store out of direct sunlight and under cover.
