

PEAK 50 + 7% UREA

AVAILABLE IN 18 & 35KG BLOCKS

A premium protein supplement for pregnant, lactating or weaning livestock, or dry pastures. Contains urea, bypass protein and minerals.

Olsson's Peak 50 Plus 7% Urea is a supplement block containing urea, bypass protein, and minerals. It is formulated for use with livestock grazing dry pastures, during periods of high nutritional demand such as lactation, or in feeding systems where additional protein is required.

The inclusion of bypass protein provides a source of protein and energy in block form, supporting livestock in a range of seasonal feeding conditions. Peak 50 Plus is suitable for use where pasture protein levels have declined, including pre-lambing or calving periods.

Warning: Products containing urea can be toxic to livestock. Please ensure proper farm management practices are employed.

Storage Instructions:

Store out of direct sunlight and under cover. Avoid contact with skin and eyes.

DIRECTIONS FOR USE	TYPICAL ANALYSIS			
Sheep/Goats: 5-10g per head per day Cattle: 50-100g per head per day Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies. Place out sufficient blocks to avoid overcrowding of stock. Replace immediately when consumed.	Bypass Protein Meal	50%	Calcium (Ca)	1.42%
	Urea	7%	Phosphorus (P)	0.4%
	Total Protein Equivalents	35%	Sulphur (S)	2.5%
	Molasses	10%	Magnesium (Mg)	0.88%
	Salt (NaCl)	24%	Zinc (Zn)	18.62mg/kg
