Glucose	2.2g/100g
Maltose	0.2g/100g
Lactose	0.2g/100g

FOR ANIMAL TREATMENT ONLY.

**THIS PRODUCT DOES NOT CONTAIN
RESTRICTED ANIMAL MATERIAL.**

When an animal is in distress, stress hormones and adrenalin effect the electrolyte mineral balance in the animal's body,

Stock Tranz is a water soluble supplement in tablet form containing a balanced array of essential minerals, glucose & fructose. These essential minerals and sugars naturally lower the animal's stress levels, while also hydrating and replacing depleted electrolytes. Stock Tranz can help reduce dark cutting by increasing glycogen levels and controlling the release of stress hormones. This results in a calmer, easier to handle animal.

DIRECTIONS FOR USE

Application:

Drop one tablet into a water supply (water tank or trough). It will slowly dissolve, supplying all livestock with a balance of essential minerals, glucose & fructose. Nil withholding period.

Feeding guide:

100 head: 3x1kg bricks/day
1000 head: 30x1kg bricks/day
2/3 in trough in morning & 1/3 at night prior to trucking.

Storage Instructions:

Packet must remain sealed when not in use. Store out of direct sunlight.
