

BLUE CAVIAR EQUINE BLOCK

AVAILABLE IN 16 & 40KG BLOCKS

A calcium & mineral supplement to assist where deficiency may be prevalent. Plus seaweed, essential linseed oil & biotin.

Olsson's Blue Caviar Equine Block is formulated for horses grazing pastures such as buffel, kikuyu, setaria, and other exotic grasses.

Extended grazing on these types of pastures has been associated with a condition commonly referred to as "Big Head" in horses. This condition is linked in published research to dietary imbalances involving calcium and phosphorus, where calcium can become unavailable due to excess dietary phosphorus. Reported signs include facial bone changes and other skeletal issues.

This product is provided as a nutritional supplement only and is not intended to diagnose, treat, or prevent any disease or condition; veterinary advice should be sought where health concerns are present.

Storage Instructions:

Store out of direct sunlight and under cover. Avoid contact with skin and eyes.
